

UNIVERSAL[®] COIN PROCESSING EQUIPMENT

MODEL 360 HIGH SPEED COIN COUNTER

SPEED

Time is the true currency in business. Universal's Model 360

empowers you to manage this precious resource and maximize productivity with blazing fast counting speeds of up to 6,000 coins per minute. Combining speed with the Model 360's large 50,000 coin capacity hopper allows high volume users to process over 2.5 million coins per day!

ACCURACY

When it comes to money, customers demand accuracy and the Model 360 delivers. The

machine's impressive counting speed does not compromise its ability to provide exact counts. With a greater than 99.99% accuracy rate, the Model 360 has pinpoint precision counting. The Model 360 is literally capable of stopping "on a dime"!

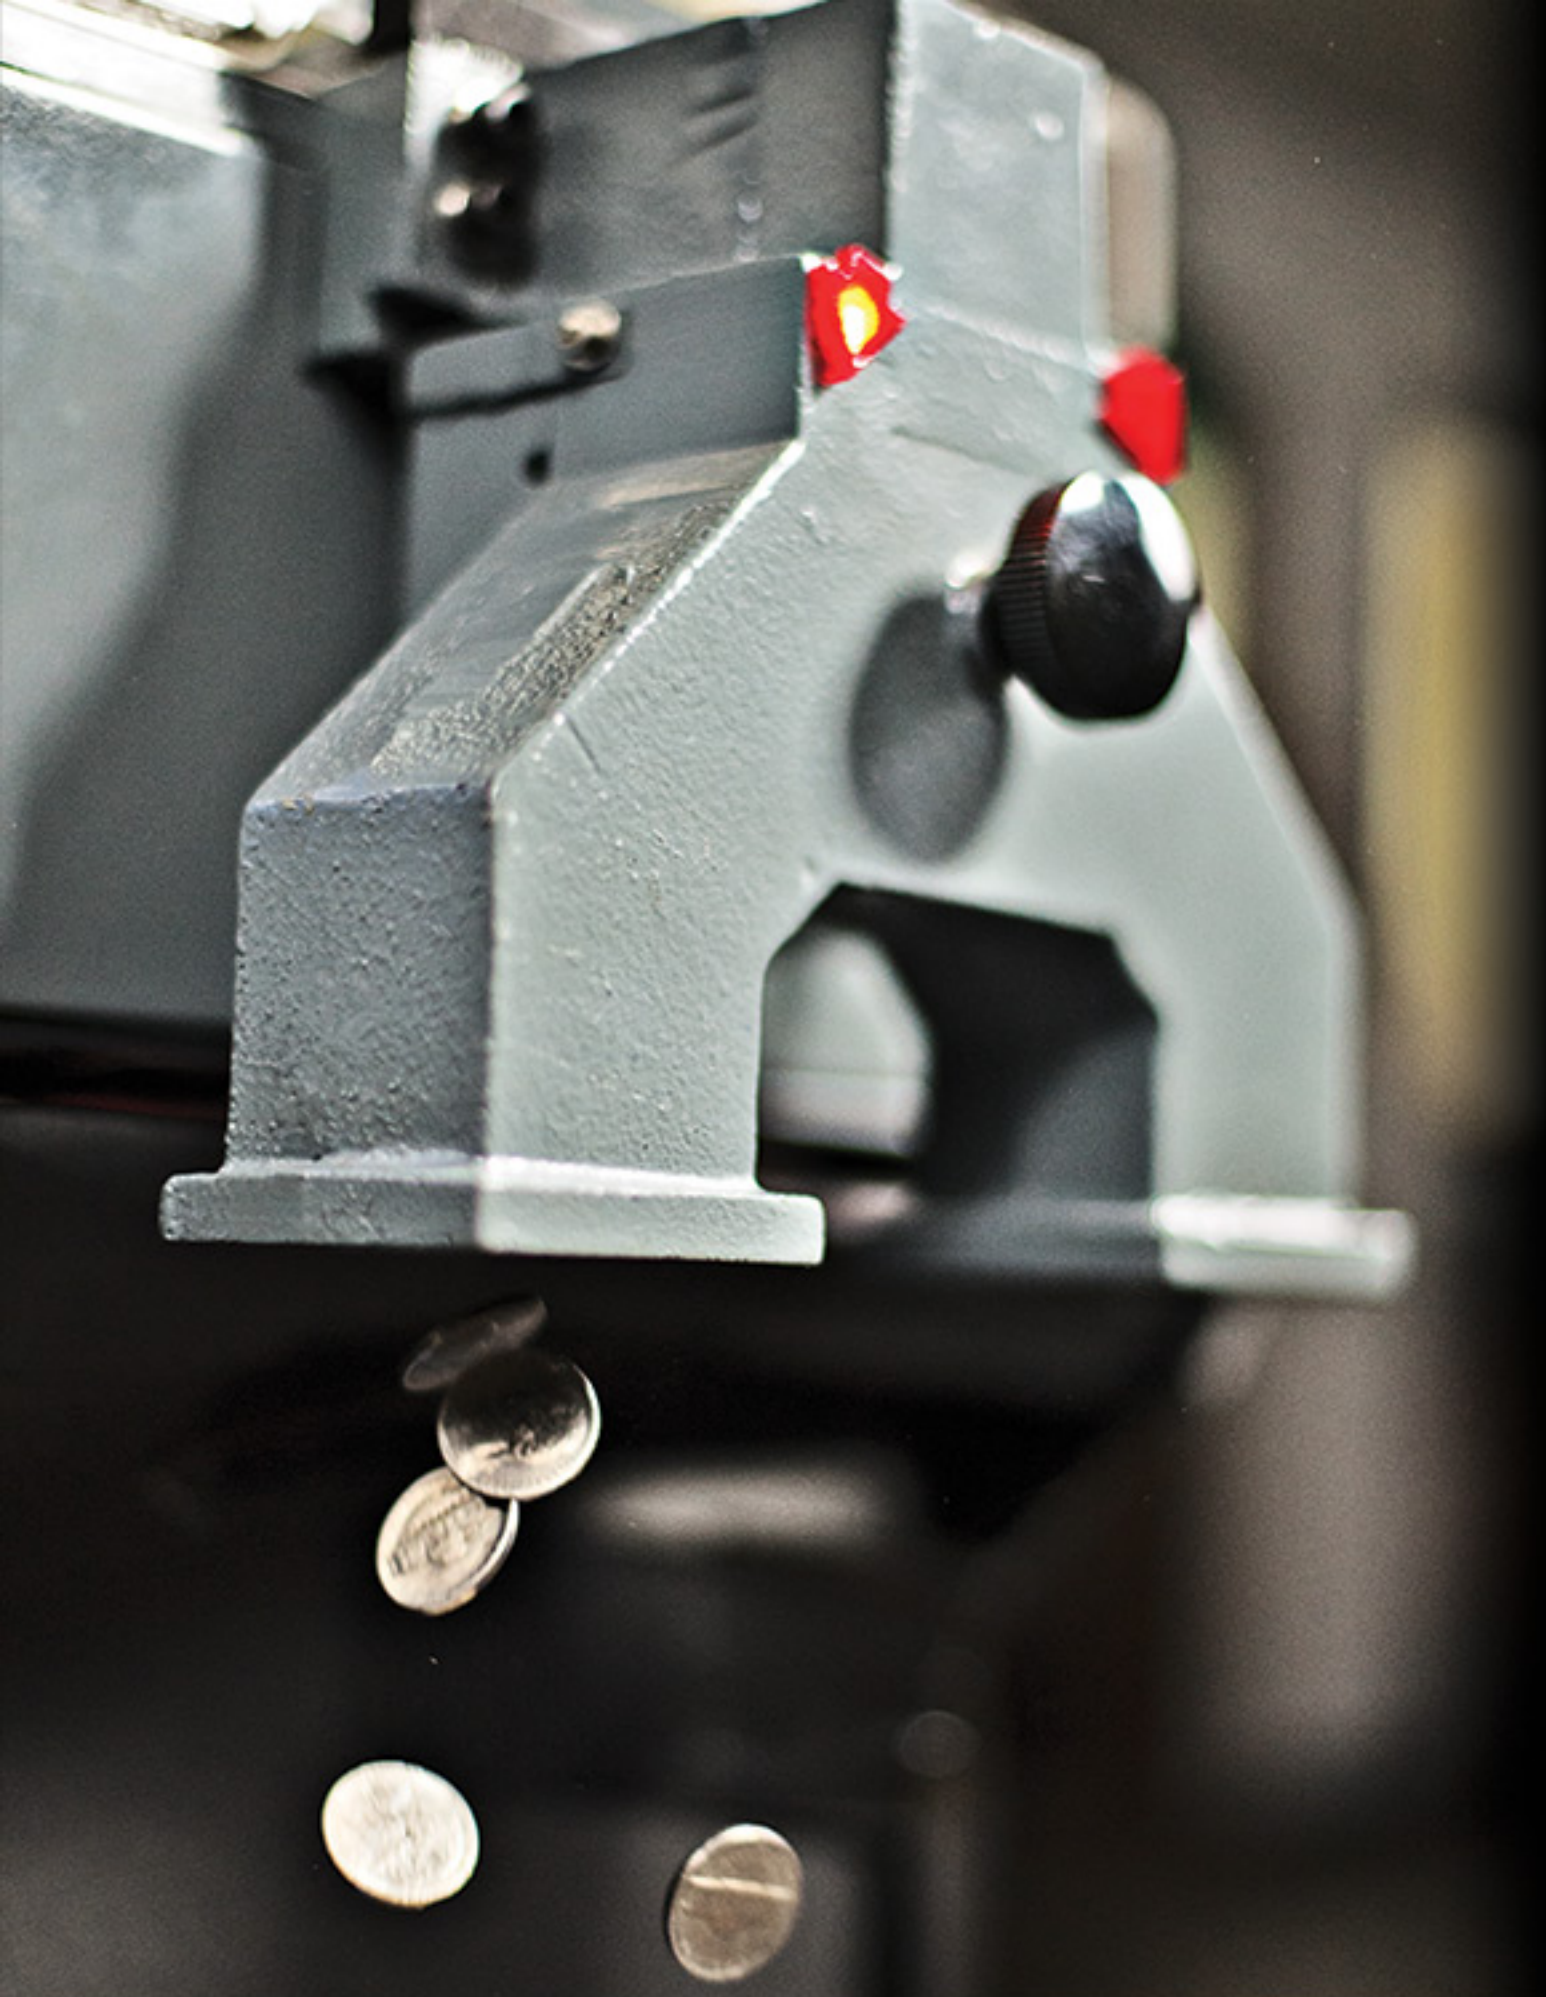

RELIABILITY

Robust construction, exceptional speed, and accuracy make

the Model 360 a preferred counter in the minting, transportation, and banking industries. Many customers have been using their Model 360 for decades without replacement. You will not find another coin counting machine with the proven reliability and longevity of the Model 360.

FOR AN ACCURATE COUNT • COUNT ON UNIVERSAL[®]

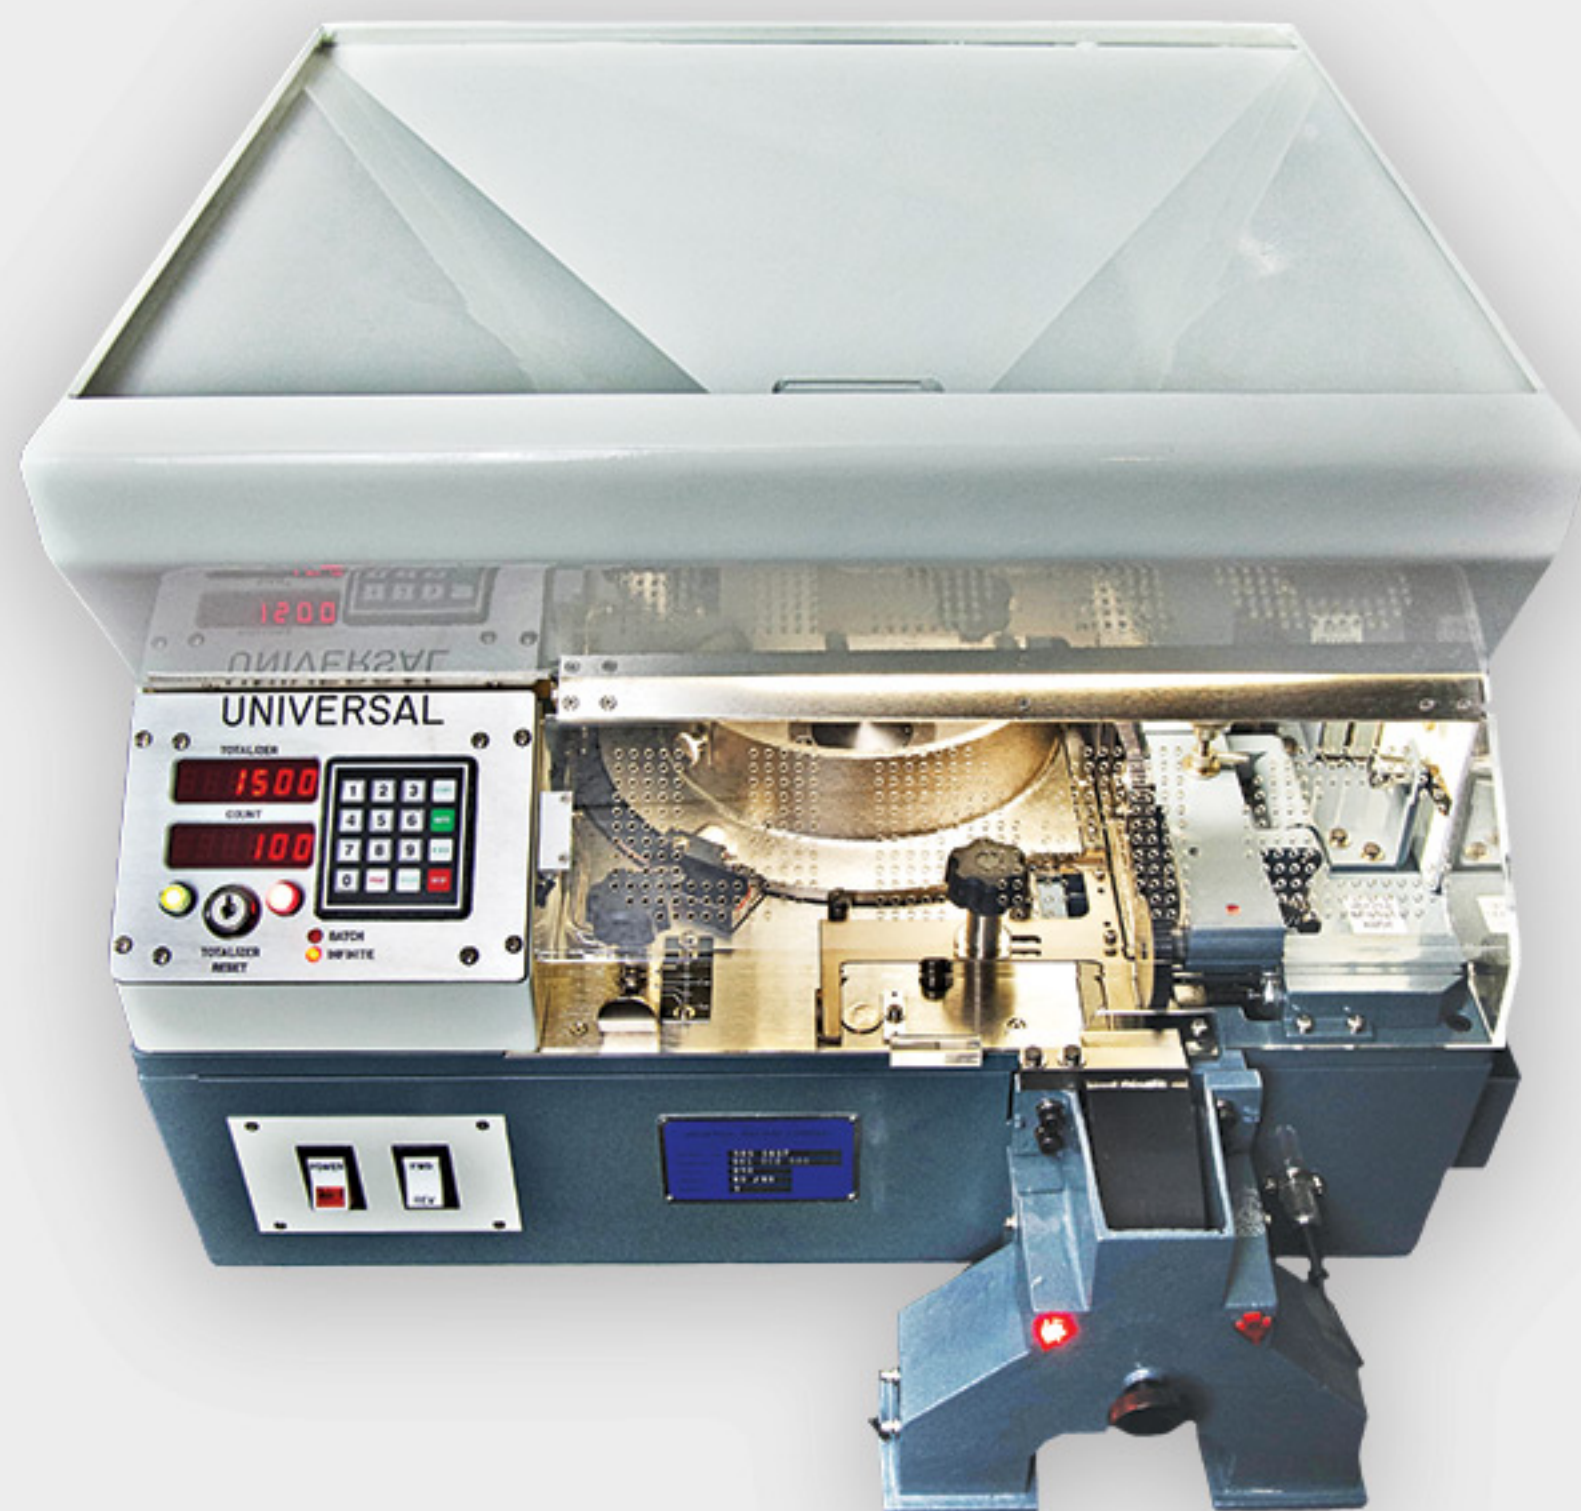

COMMITMENT TO EXCELLENCE

Universal is committed to providing quality high speed coin counting machines that you can depend on for years of trouble free operation. Feedback from our customers throughout the years has been a key element in our pursuit of design improvements. Higher levels of operating efficiency and durability have been achieved through our advances in the manufacturing process thanks greatly to customer feedback. Our current version of our Model 360 is the product of many years experience on the factory floors of companies around the globe.

Universal's philosophy is to establish, build and maintain a long lasting business relationship with our customers. We want to be your "Partner in Production" by providing prompt and courteous customer service support. Universal is here to satisfy your coin processing needs, as we have for others, worldwide, since 1971.
